Session- (2020 - 2021)

(Odd/Even Semester)

Name of Activity	Discussion on latest topic/research topic / library (Advanced Student Activity)
Date	23/05/2021 from 4.00pm to 5.00pm
Venue	meet.google.com/dxz-bosg-zqn
Organized by	Department of Physics
Name of Faculty	Dr. Anirban Ray
Participated by	2 nd Semester Honours Students(DC4)
Content	Complete solution of forced oscillatory system.
Objective	To teach students about non-homogenous second order differential equation
Outcome of Activity	Student learned solving a general forced oscillatory system

Name of Activity	Discussion on latest topic/research topic / library (Advanced Student Activity)
Date	22-05-21
Venue	Google meet Id- https://meet.google.com/wpd-fuyr-yfu
Organized by	Dept of Physics
Name of Faculty	Dr. Arka Chaudhuri
Participated by	Students of 3 rd Year Physics Honours who secured more than 60% marks in average in the first year and second year University exam
Content	Effective Mass of electrons, Concept of hole and Drude's derivation of electrical conductivity from free electron theory
Objective	Effective mass of electrons and concept of hole is a very advanced topic from the point of view of BSc Honours students. This concept is needed for one to do higher studies in Physics in general and Condensed Matter Physics in particular. Hence with this in mind I again taught this topic in class so that some students be benefited.
Outcome of Activity	This class helped the students to get a more better idea about the band theory of solids. The youtube link is shared after the attendance.

(3rd Year)

Name of Activity	Discussion on Fermi Dirac Distribution Function and Fermi Energy of electron gas. Discussion on some selected problems of the assignment which students could not solve.
Date	24-05-21
Venue	Google meet Id- https://meet.google.com/wpd-fuyr-yfu
Organized by	Dept of Physics
Name of Faculty	Dr. ARKA CHAUDHURI
Participated by	Students of 3 rd year Physics Honours who secured less than 55% marks in average in the First and Second year University exam
Content	The Fermi Dirac distribution function and its graphical representation. The derivation of the Fermi energy of an electron gas. Discussion on some problems of the assignment on Statistical Mechanics which some students could not solve.
Objective	Fermi Dirac distribution is a very basic and significant topic which needs thorough understanding. It has many applications in Solid state Physics as well as statistical mechanics. Some students like Manojit Bhagat, Debasish Dutta, Mustafa Kamal, Nasim Akhtar could not understand it when I first taught it. So for them as also for the whole class I repeated it again. Besides I discussed some problems of the assignment on Statistical mechanics which many students could not solve.
Outcome of Activity	As mentioned earlier that Fermi Dirac Statistics is a very important topic having many applications. Hence discussing this again made the students more confident about the topic. Besides there are some weak students as mentioned earlier who could not understand it at all or were absent in the earlier class. Hence they also cleared their concepts about it. The criterion which I chose to distinguish between slow and fast learner was the average of the marks obtained by them in the First and second year University exam. The students who secured less than 55% marks were treated as slow learners and who obtained more than 60% marks were treated as advanced learners.

9:23 PM

GourMahavidyalaya, Mangalbari, Malda

Department of Physics

Session- (2020 - 2021)

(Odd/Even Semester) : 2nd semester

Name of Activity	Discussion on topic already been delivered (Fast Learner Activity)
Date	25.05.02021
Venue	Google meet
Organized by	Department of Physics
Name of Faculty	Sadhan Biswas
Participated by	B.Sc Physics, 2nd Semester students(DC3)
Content	Electromagnetic induction, differential form of Faraday's law, Induced emf in rotating disc in external magnetic field, source of alternating current
Objective	Revision of the topic to help the students to get clear concepts
Outcome of Activity	The students understand the concepts

(Odd/Even Semester) : 2nd semester

Name of Activity	Discussion on topic already been delivered (SlowLearner Activity)
Date	24.05.02021
Venue	Google meet
Organized by	Department of Physics
Name of Faculty	Sadhan Biswas
Participated by	B.Sc Physics, 2nd Semester students
Content	Electromagnetic induction, Laws of electromagnetic induction, conservation law of energy from Lenz's law and vice-versa, Induced emf
Objective	Revision of the topic to help the students to get clear concepts
Outcome of Activity	The students understand the concepts

Name of Activity	Discussion on topic already been delivered (FastLearner Activity)
Date	25.05.02021
Venue	Google meet
Organized by	Department of Physics
Name of Faculty	Sadhan Biswas
Participated by	B.Sc Physics, 4th Semester students(DC8)
Content	Complex analysis , analytic function , Singular point , pole , branch point, Cauchy-Riemann condition, Cauchy's integral formula
Objective	Revision of the topic to help the students to get clear concepts
Outcome of Activity	The students understand the concepts
