

Slow & Advanced Learner System for the session 2020-2021

Department of Political Science Gour Mahavidyalaya Mangalbari, Malda

Introduction:

We the Department of **Political Science** of Gour Mahavidyalaya, have initiated the academically 'slow & advanced learner' system. Our aim is to bring the best among the students. Advanced learners are motivated to strive for higher goals and are encouraged for higher studies. They are provided with additional inputs by offering special coaching.

The slow learners are never considered as poor achievers as that can hurt their motivation and their interest. This can eventually make them more distressed and introvert in the class. Hence, we treat them like any other student in the class but they are provided extra attention for improvement and achievement. The Department and every individual teacher help slow learners by providing proper guidance and support to them.

We encourage advanced learner to be supporters to the average and the slow learners as it will help to maintain the brotherhood among all students. We keep our advanced classes open to all not limiting to advanced learners only.

Guidelines for identifying Advanced Learners (Academically advanced):

- Advanced Learners are those students who are ahead on the learning curve and can grasp advanced topics/ subjects faster than others.
- Advanced learners are identified based on the performance in University Examination of previous semester, internal examinations and class responses.

Guidelines for Slow Learner (Academically weak):

- The connotation of academically slow learner (Weak Students) means those who could not keep pace with the classroom teaching needs extra attention so as to bring such students at par with the rest of the students of the class.
- Slow learners are identified based on their performance in University Examination of previous semester, internal examinations and class

Our observations:

We, the faculties of Political Science department, analyze the students' progression on regular basis. We noticed during COVID-19 situation their marks have increased considerably, especially among slow learners. Our analysis also shows online examination has drastically reduced the marks difference between slow and advanced learners. Unfortunately, class responses do not always reflect the same in terms of quality. We further believe, 'slow & advanced learner' system is still in a nascent stage in our department and we shall also evolve with time so that we can push our students towards a better future.
